BUILDING GREEN? WE CAN HELP!

In your effort to help the environment you have decided to do your part in building green, so you can leave a smaller environmental footprint. We at A-1 Construction can help. We now have available a line of environmentally friendly shingles.

The Manufacturer is GAF-ELK
Product: Cool Color Series shingles

These unique shingles from GAF-ELK slow heat buildup to make the home more energy efficient. They feature highly reflective roofing granules that bounce back the sun's rays and more effectively release absorbed heat. They are rated by the Cool Roof Rating Council (CRRC) and meet initial ENERGY STAR performance levels.

Cooling the Heat Island Effect, One Roof at a Time

In addition to potential savings on your energy bills, a cool roof could have environmental benefits as well. According to the EPA, the "heat island effect" is a growing concern for millions of Americans living in and around cities.

Urban and suburban temperatures can be 2 to 10 degrees F hotter than nearby rural areas—creating what scientists call a heat island. These hot zones form as cities replace natural land cover with pavement, buildings and other infrastructures that radiate heat back into the air, increasing the overall temperature.

These urban temperatures can effect the environment and energy usage. These temperatures can impact communities by increasing peak energy demand and air conditioning costs. Several cities throughout the US are looking into ways to combat this phenomenon.

GAF-ELK Cool Color Series can have a positive impact on its surroundings. A cool roof not only eases energy consumption at peak demand times, but it can also reduce the impact on the surrounding outside air temperature, potentially lessening the heat island effect.

We at A-1 Construction are interested in doing our part to help you build green.

We also have available a large selection of new styles and colors of shingles for you to view at our showroom.— from a standard 30 year laminated shingle to many styles of high end lifetime warrantee shingles.

If you are interested in more information about the Cool Color shingles, or any of our other shingle styles, please feel free to call or visit our showroom.
